Evidence of Review — By Department

Arctera Surveillance · Sample Reference Report · Enhanced Reporting API

REPORT DESCRIPTION The Evidence of Review report provides evidence that captured communications have been reviewed. In this example, the option “Return by department” was selected, which groups items by department (the other option is by monitored employee). Use it to demonstrate review coverage — how many items were captured, sampled, and reviewed for each department — for supervision and audit purposes.

Report parameters

These are the criteria selected when the report was generated. They define the scope of the results below. Each parameter’s own description is in the third column.

Timezone	Pacific Standard Time	
ReportName	EvidenceOfReviewByDeptAudit2026	Specifies the name of the report.
StartDate	07/02/26 12:00:00 AM	Specifies the start date for the report. The output returns counts for items with a capture date on or after this date.
EndDate	07/03/26 11:59:59 PM	Specifies the end date for the report. The output returns counts for items with a capture date on or before this date.
ReturnByDepartment	Yes	Determines whether report results are grouped and returned by department. If No, items are grouped by monitored employee.
Departments(Id)	["LegalCompliance-East(21760)","RiskManagement-West(21757)","HREmployeeRelations-Central(21758)","FinanceOperations-North(21759)"]	Specifies the departments used to filter results. The output returns records belonging to these departments.
CaptureTypes(Id)	All	Specifies the capture modes to include. The output returns records matching the selected capture techniques.
MessageDirections(Id)	All	Specifies the message directions to include when filtering report results.
Searches(Id)	All	Specifies the searches to include when filtering report results.
MessageTypes(Id)	All	Specifies the types of captured items to include. The output returns records matching the selected message types.
MonitoredEmployees(Id)	All	Specifies the monitored employee IDs for which the report will be generated.
ReturnZeroCaptureRecords	No	Specifies whether to include items with a zero result count. If False, records with no activity are excluded from the output.

How to read this report

-1 in any field means **Not Applicable**. Because this report is grouped by department (**ReturnByDepartment = Yes**), the monitored-employee fields (`principalID`, `PrincipalName`) and `TotalMessagesForSampling` are not applicable, while `SearchHits` is applicable. Only capture types 2, 6, and 99 are valid for Evidence of Review.

CaseID	Department identifier (Case ID) the row belongs to.
Department	Department name.
principalID	Monitored employee ID. Returns -1 because this report is grouped by department (ReturnByDepartment = Yes).
PrincipalName	Monitored employee name. Not applicable when grouped by department.
MessageTypeID	Numeric identifier of the captured item's message type (see MessageType for the name).
MessageDirectionID	Numeric identifier of the message direction (see MessageDirection for the name).
CaptureTypeID	Numeric identifier of the capture type. Only capture types 2, 6, and 99 are valid for Evidence of Review.
TotalMessagesForSampling	Total messages considered for sampling. Returns -1 when grouped by department (Not Applicable).
Captured	Number of items captured.
UnReviewed	Number of captured items that have not been reviewed.
UnreviewedIrrelevant	Number of unreviewed items marked as irrelevant.
UnreviewedRelevant	Number of unreviewed items marked as relevant.
Pending	Number of items in the Pending review state.
Questioned	Number of items marked as Questioned.
ReviewedIrrelevant	Number of reviewed items marked as irrelevant.
ReviewedRelevant	Number of reviewed items marked as relevant.

Copyright ©2026 Arctera US LLC. All rights reserved.

MessageType	Message type name (for example, Exchange, Instant Messaging, Domino, EWS, CellTrust, LSEG).
CaptureType	Capture type code (for example, Clean, Policy, GuaranteedSearch, Internal).
CaptureTypeDisplayName	Human-readable capture type name.
CaptureTypeDescription	Description of the capture type.
MessageDirection	Message direction code (Internal, ExternalInbound, ExternalOutbound).
MessageDirectionDisplayName	Human-readable message direction name.
MessageDirectionDescription	Description of the message direction.
SearchId	Identifier of the search that captured the items. 0 when not applicable.
SearchName	Name of the search. Blank when not applicable.
SearchHits	Number of search hits. Applicable to Evidence of Review By Department.

Report data

This table is the report output. Each row summarizes the evidence-of-review counts for one department, broken down by message type, capture type, and message direction. Because the report is grouped by department (ReturnByDepartment = Yes), the monitored-employee fields (principalID, PrincipalName) and TotalMessagesForSampling show -1 (Not Applicable), while SearchHits is applicable.
