Item Metrics — By Department

Arctera Surveillance · Sample Reference Report · Enhanced Reporting API

REPORT DESCRIPTION The Item Metrics report gives counts of items captured in Arctera Surveillance. In this example, the option "Return by department" was selected, which groups items by department (the other option is by monitored employee). Counts are broken down by message type, capture type, and message direction. Use it to understand capture volumes across departments.

Report parameters

These are the criteria selected when the report was generated. They define the scope of the results below. Each parameter's own description is in the third column.

Timezone	Pacific Standard Time	
ReportName	DepartmentCommAudit2026	Specifies the name of the report.
CaptureDateStart	07/02/26 12:00:00 AM	Specifies the start of the capture date range. The output includes items ingested into Surveillance on or after this date.
CaptureDateEnd	07/03/26 11:59:59 PM	Specifies the end of the capture date range. The output includes items ingested into Surveillance on or before this date.
ReturnByMonitoredEmployee	No	Determines whether report results are grouped and returned by monitored employee. If No, items are grouped by department.
Departments(Id)	["LegalCompliance-East(21760)","RiskManagement-West(21757)","HREmployeeRelations-Central(21758)","FinanceOperations-North(21759)"]	Specifies the departments used to filter results. The output returns records belonging to these departments.
CaptureTypes(Id)	All	Specifies the capture modes to include. The output returns records matching the selected capture techniques.
MessageDirections(Id)	All	Specifies the message directions to include when filtering report results.
MessageTypes(Id)	All	Specifies the types of captured items to include. The output returns records matching the selected message types.
MonitoredEmployees(Id)	All	Specifies the monitored employee IDs for which the report will be generated.

How to read this report

This report gives item counts captured in Arctera Surveillance, grouped by **department** (**ReturnByMonitoredEmployee = No**), broken down by message type, capture type, and message direction. The monitored-employee columns are blank in this grouping. Counts are returned only up to the previous day; the current day is excluded.

ItemMetricsId	Row identifier for this item-metrics record.
CaptureDate	Date the items were captured (ingested).
DepartmentId	Identifier of the department.
Department	Name of the department.
MonitoredEmployeeId	Identifier of the monitored employee. Blank when grouped by department.
MonitoredEmployee	Name of the monitored employee. Blank when grouped by department.
MessageTypeId	Numeric identifier of the message type (see MessageType for the name).
MessageType	Message type name (for example, Exchange).
CaptureTypeId	Numeric identifier of the capture type (see CaptureTypeDisplayName for the name).
CaptureTypeDisplayName	Human-readable capture type name (for example, Random Sampling, Policy).
CaptureTypeDescription	Description of the capture type.
MessageDirectionId	Numeric identifier of the message direction (see MessageDirection for the name).
MessageDirection	Message direction code (Internal, ExternalInbound, ExternalOutbound).
MessageDirectionDisplayName	Human-readable message direction name.
MessageDirectionDescription	Description of the message direction.
CapturedItemsCount	Number of items captured for this combination.

Report data
