

The Summer 2019 release of Enterprise Vault.cloud is currently scheduled¹ to roll out globally during late August and into September. The goal of this release is to further reduce search and review time for Discovery Administrators.

This release focuses on usability enhancements to Discovery Archive in 3 key areas – user experience, search and exports.

WHAT'S NEW

User Experience	To expedite review, Discovery Administrators can now: <ul style="list-style-type: none">• Alter the width of the columns displayed in the search/results window• Choose whether they see 30 (default), 50, 100 or 300 search results per page during review• Type dates directly into the search box (or use existing date picker – whichever is faster for a particular search)• Experience better navigation during investigations• Further expand emails during review
Search	When performing searches, Discovery Administrators can now: <ul style="list-style-type: none">• Delete multiple saved searches at a time• Print a report of search terms on a per Matter basis• View a large number of search criteria• Use a query language to create searches using complex search strings
Exports	When exporting search results, Discovery Administrators can now: <ul style="list-style-type: none">• Perform self-service cancellations of exports (at batch level)• Maintain folder structure (for customers with Personal Archive + Folder Sync only)

¹ All future release dates are tentative and are subject to change at the sole discretion of Veritas. While the features and enhancements listed above are scheduled for the dates mentioned, Veritas makes no assurances that any or all of these features and enhancements will be available at any time. Customers looking to purchase or renew their services with Veritas should do so solely based on the features of the service available at that time.
